

Java Array List: Peter in Problem!

Peter is a very intelligent student. A new professor came to college & heard the about Peter. So to test his skills the professor gave him a programming problem. According to the problem Peter has to first set elements in Hash Map then he has to separate the key and the value & show each key & its corresponding value as an output.

Now Peter is stuck & is afraid of losing all of his reputation.
Peter shouts for help!

Would you like to help Peter?
